

EZ Patrol – Guard Tour Patrol System

Patrol management for business & industries

EZ Patrol is a cloud-based application. It helps to overcome the disadvantages of traditional guards' paper logs such as data forgery, data lost and prone to damage. EZ Patrol effectively tracks guard tours, reduces paper load, keeps data secured and simplifies the process for both guards and management.

Case Study :

A while ago, Police Department's QR Code based patrol system was found flaw. Officers use the method of snapshot QR Code in order to pretend that his/her has been to the patrol location and thus forge his/her patrol logs.

Features

1. Check-in : With iBeacon technology and mobile app, EZ Patrol can detect whether guards have physically arrived at checkpoints and logs check-in time accordingly.
2. Real-time data : Guard patrol data is uploaded to cloud server for accountability and reliability.
3. Abnormal report : In addition to check-in data, guards can send text and photo image to report abnormal events.
4. Data analysis : All the patrol data are kept at cloud server for analysis.

EZ Patrol – Guard Tour Patrol System

School safety management

School safety is crucial and zero tolerance of failure. EZ Patrol replaces the existing paper & pen patrol method. Security staff only need a mobile device and, with some simple touches on the screen, they can check-in at checkpoints, send immediate alerts, write messages, take photo images, etc. The monitoring center can track real-time patrol information effortlessly.

Solve management problems

Features

Accountability

Logs are kept secured and easy to retrieve.

Safety

Increase students safety

Automation

Real-time logs and report

Environmental

Paperless

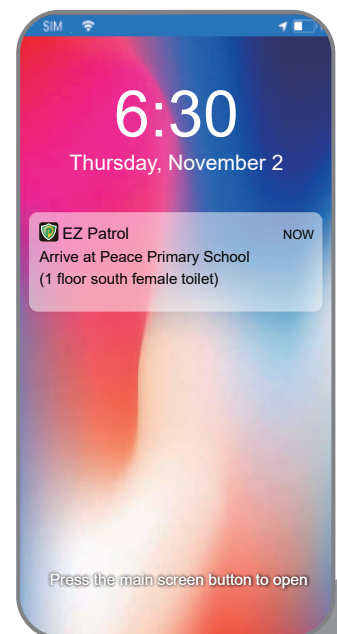

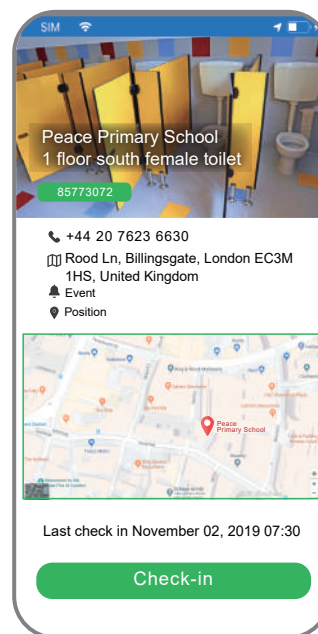

Management

Eliminates paper load and reduces worktime
