

# Enterprise Access Control & Security Cloud Management Integration Indoor Presence System

Enterprises are profit oriented. In order to ensure long-term profits , business strategy must be protected from outsider. In addition to information security, the concerns of physical security has been raised significantly. Indoor Presence System (IPS) can effectively manage staff and goods in the organization and business such as factory, e-commerce and logistic.

Other applications such as :

Indoor management technology to quickly locate people inside the building.

In the case of an emergency occurs, it can quickly guide people to safe areas.

Every BLE card comes with a SOS button. If a card-holder encounters any danger, such as stuck in a lift, card-holder can press SOS button and send out signal for help.
