# iToudai (BLE + NFC Beacon)

iToudai integrates Bluetooth 4.1 (Bluetooth Low Energy, BLE) signal transmitter (iToudai beacon) with a smart phone App in order to provide an indoor presence system.

iToudai broadcasts signals continuously, like a lighthouse. Once the smart phones enter a iToudai's transmission radius, they immediately receive an ID number from iToudai. App then triggers designated events for this ID number, such as push notification, opening a web page or start downloading a file from the Internet.
Application : Consist of locating and payment capability.

iToudai can be deployed for indoor navigation, mobile payment, shopping guide, visitor flow analysis.

● Retail :

Customers enter a store and receive instant promotional message of a product. It can also assist the store manager to realise its consumer behavior and collect flow data.

● Payment :

When a user enters or leaves a field, the user automatically initiates the payment.
For example, tickets for tourist attractions.

● Traffic :

Information passing, such as transfer guide, navigation, weather at airports, railway stations and subway.

● Home :

At home, iToudai can be used as an auto-switch for smart appliances.
In addition, iToudai can inform parents that their kids have returned home via children's mobile phone.
● Factory :

iToudai can be integrated into a plant site inspection structures and facilities, such as restricted area and equipment assembly line check point. It also helps to achieve 5S scope, inventory confirmation, quality assurance, security access control, power safety.

Benefit : Economical and Multi-purpose applications

iToudai is a low cost, high efficiency digital advertising tool for enterprises.

As long as the consumer has a smart phone with Bluetooth 4.1, they will receive the promotional news from the shop while they are shopping. Moreover, iToudai can help business further more, such as customer analysis. It allows enterprises to grasp the depth of consumer preferences and behavior, assist enterprises to carry out precision marketing, hence increase its revenue.

《 Specifications & Features 》

●BLE Beacon

Encrypted signal of high security and privacy. (Optional) iOS & Android.	
Internal Motion Sensor can be applied in specific needs.	
Battery status monitor (Optional)	5 levels indication (Status are sent back to cloud server)
Signal Preference	Transmission interval Daily timer : Working / sleeping cycle
Button Function	Long press to enable parameter configurations.
Specifications	Size : 90.1*57*5.7±0.5mm Slot size : 86*54*0.51~0.76mm (20~30mil) Weight : 26g (with battery) CAD-825 use CR2032 Battery x2
Battery detection	(Capable of encapsulating power in broadcast signals)
Power supply	Support power switch, which can be easy to turn off.

●Battery

Powered by one battery

Operating Time	CR2032 / 2 pieces (420mAh)
12H/day	850 days
24H/day	500 days

※ Approximated battery life time.
  (Condition : Interval 1000ms ; RF Power : 0dbm)

●Built-in NFC function (available separately)

Tool for adjusting Beacon's ID's, signal strength, signal frequency and etc.
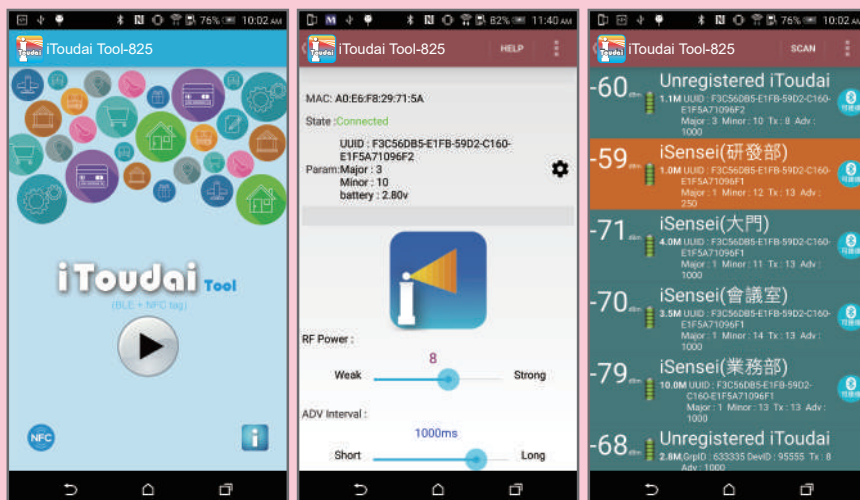

Basic functions

1) Beacon's signal strength and proximity indicator.
2) Beacon's battery status display.
3) Beacon's filter.
4) Cloud data transmission.
5) UUID, Major, Minor modification.
6) ADV interval and TX power configuration.
7) Display Beacon's battery status.
8) Scheduling time and switch.
9) Vibration wake-up time and switch.
