

iToudai (BLE Beacon)

iToudai integrates Bluetooth 5.0 (Bluetooth Low Energy, BLE) signal transmitter (iToudai beacon) with a smart phone App in order to provide an indoor presence system.

iToudai broadcasts signals continuously, like a lighthouse. Once the smart phones enter a iToudai's transmission radius, they immediately receive an ID number from iToudai. App then triggers designated events for this ID number, such as push notification, opening a web page or start downloading a file from the Internet.

Application : Consist of locating and payment capability.

iToudai can be deployed for indoor navigation, mobile payment, shopping guide, visitor flow analysis.

For example, the following scenario :

● Retail :

Customers enter a store and receive instant promotional message of a product. It can also assist the store manager to realise its consumer behavior and collect flow data.

● Payment :

When a user enters or leaves a field, the user automatically initiates the payment. For example, tickets for tourist attractions.

● Traffic :

Information passing, such as transfer guide, navigation, weather at airports, railway stations and subway.

● Home :

At home, iToudai can be used as an auto-switch for smart appliances. In addition, iToudai can inform parents that their kids have returned home via children's mobile phone.

● Factory :

iToudai can be integrated into a plant site inspection structures and facilities, such as restricted area and equipment assembly line check point. It also helps to achieve 5S scope, inventory confirmation, quality assurance, security access control, power safety.

Benefit : Economical and Multi-purpose applications

iToudai is a low cost, high efficiency digital advertising tool for enterprises.

As long as the consumer has a smart phone with Bluetooth 4.1, they will receive the promotional news from the shop while they are shopping. Moreover, iToudai can help business further more, such as customer analysis. It allows enterprises to grasp the depth of consumer preferences and behavior, assist enterprises to carry out precision marketing, hence increase its revenue.

Specifications & Features

BLE Tag

Encrypted signal. It's high security and privacy. (Optional / iOS & Android applies)	
Internal Motion Sensor can be applied in specific needs.	
Battery status monitor (Optional)	• 5 levels indication (Status are sent back to cloud server)
Signal Preference	• Transmission interval • Work / sleep cycle(Daily start-time)
Button Function Description	• Short press / Long press : (Can be customized as required)
LED status indication	• Can be customized as required
Waterproof	• Yes (IP56 class)
Specifications	• Size : Diameter 23.7/ thick 15(mm) • Weight : 7g • KRT-0462 use CR2032 battery

Battery

Powered by one battery

Operating Time	CR2032(220mAh)
4H/day	336 days
8H/day	261 days
12H/day	203 days
24H/day	125 days

※ Approximate battery life (transmission interval 1000ms; RF Power : 0dbm) Different broadcast frequency/power will affect the battery life.

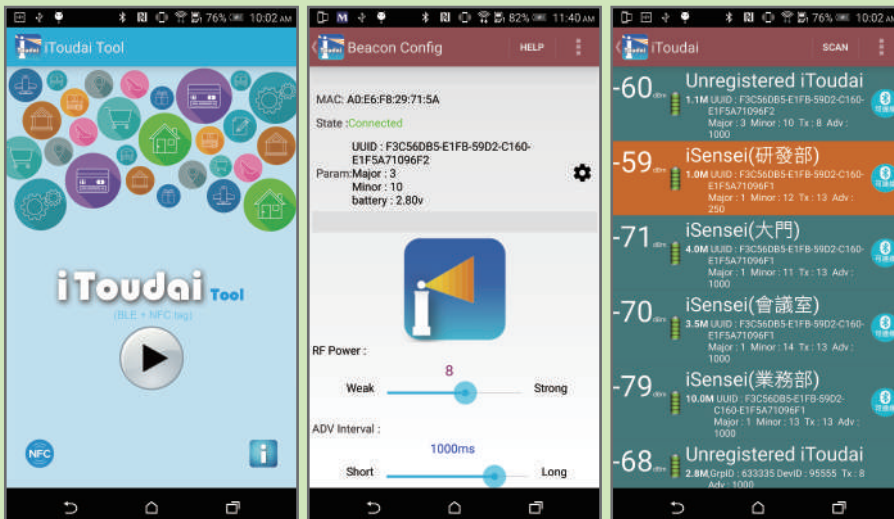

Specifications / Size	LAN-M-0462 Beacon Medium LAN Receiver	USB-0462 Beacon USB Receiver
Photo		
Working power supply	POE / 9VDC	USB 5V
LED indicator	Yes	Yes
Received distance (conservative)	25m	25m
Alarm indicator	No	No
Physical dimension	Ø100 / D50(mm)	W74.3 / H30 / D12 (mm)
Weight	108g	14g
Waterproof	No	No
With alarm buzzer	No	No
Use of the occasion / use	Classroom, lecture hall, attendance system	Plug and play, cloth with flexibility

iToudai Tool configuration APP

Enter password → Configuration

Tool for adjusting Beacon's ID's, signal strength, signal frequency and etc.

Basic functions

- 1) Beacon's signal strength and proximity indicator.
- 2) Beacon's battery status display.
- 3) Beacon's filter.
- 4) Cloud data transmission.
- 5) UUID, Major, Minor modification.
- 6) ADV interval and TX power configuration.
- 7) Display Beacon's battery status.
- 8) Scheduling time and switch.
- 9) Vibration wake-up time and switch.
