

High Density Vibration Isolators

- Using macromolecular synthetic plastic, it is gray in appearance
In standard isolators when black impurities are used it is black in appearance.
- Embedded steel plates, never ages, or become deformed.
- Applicable for use with main systems water towers pumps electromechanical equipment.
- This item is used to prevent vibration, and is not used on stationed fixtures.

LP-1

Load : 250 kg
Dimension : 167×105×90 mm
Round diameter : 92 mm

LP-2

Load : 65kg
Dimension : 106×63×65 mm
Round diameter : 52 mm
