

iToudai (BLE Beacon)

iToudai integrates Bluetooth 5.0 (Bluetooth Low Energy, BLE) signal transmitter (iToudai beacon) with a smart phone App in order to provide an indoor presence system.

iToudai broadcasts signals continuously, like a lighthouse. Once the smart phones enter a iToudai's transmission radius, they immediately receive an ID number from iToudai. App then triggers designated events for this ID number, such as push notification, opening a web page or start downloading a file from the Internet.

Application : Consist of locating and payment capability.

iToudai can be deployed for indoor navigation, mobile payment, shopping guide, visitor flow analysis.

● Retail :

Customers enter a store and receive instant promotional message of a product. It can also assist the store manager to realise its consumer behavior and collect flow data.

● Payment :

When a user enters or leaves a field, the user automatically initiates the payment. For example, tickets for tourist attractions.

● Traffic :

Information passing, such as transfer guide, navigation, weather at airports, railway stations and subway.

● Home :

At home, iToudai can be used as an auto-switch for smart appliances. In addition, iToudai can inform parents that their kids have returned home via children's mobile phone.

● Factory :

iToudai can be integrated into a plant site inspection structures and facilities, such as restricted area and equipment assembly line check point. It also helps to achieve 5S scope, inventory confirmation, quality assurance, security access control, power safety.

Benefit : Economical and Multi-purpose applications

iToudai is a low cost, high efficiency digital advertising tool for enterprises.

As long as the consumer has a smart phone with Bluetooth 4.1, they will receive the promotional news from the shop while they are shopping. Moreover, iToudai can help business further more, such as customer analysis. It allows enterprises to grasp the depth of consumer preferences and behavior, assist enterprises to carry out precision marketing, hence increase its revenue.

Specifications & Features

● BLE Tag

Protocol options	iToudai / iBeacon
Bluetooth version	BLE5.0 Low Energy
Other main functions	SOS Button (Optional)
Waterproof	No
Specifications	Size : Diameter 48/ thick 14.7 ± 0.5 (mm) Weight : 20g (with battery) WTG-0462 use CR2477 battery
Operating Temperature	0°C ~60°C
Storage Temperature	-25°C ~65°C
Bluetooth Sensitivity	-97dBm
Bluetooth Maximum	4dBm
Bluetooth Antenna	pcb antenna
Bluetooth Security	AES128 (Optional)
Bluetooth Frequency	2,402-2,480 MHz
Operating Supply Voltage	2V~3.6V

● Battery

Specifications	Model : CR2477 Battery power : 1000mAh Replace battery : Pull the side cover (without removing entire cover) (Insulation film is placed in all new iToudai)
Battery status monitor (Optional)	Divided into 3 levels of power display (Mobile/Background Return Mechanism)
Battery life	395days (Condition : 1000ms/0dBm)

Advantages / Features

- 30% more battery life, more durable, more power-saving!
The Bluetooth signal is more stable!
- Scheduled timer for daily operating time . (Power saving)
- Encrypted signal. It's high security and privacy . (Optional)
- Shell-style cover design, It's the most convenient way to change the battery (easy and quick). Insulating film is placed in all new iToudai.

iToudai (Beacon)

Magnetic
WTG-825

Installation

Use of magnet (included) or / Hook-and-loop to put it on the wall.

iToudai Battery Checkpoint

iToudai Tool configuration app

| Enter password → Configuration |

Tool for adjusting Beacon's ID's, signal strength, signal frequency and etc.

Basic functions

- 1) Beacon's signal strength and proximity indicator.
- 2) Beacon's battery status display.
- 3) Beacon's filter.
- 4) Cloud data transmission.
- 5) UUID, Major, Minor modification.
- 6) ADV interval and TX power configuration.
- 7) Display Beacon's battery status.
- 8) Scheduling time and switch.
- 9) Vibration wake-up time and switch.
